

INTERVIEW IN THREE STEPS

Target

Equal participation of all students, partly because there are few escape routes. 50% of the class talking at the same time.

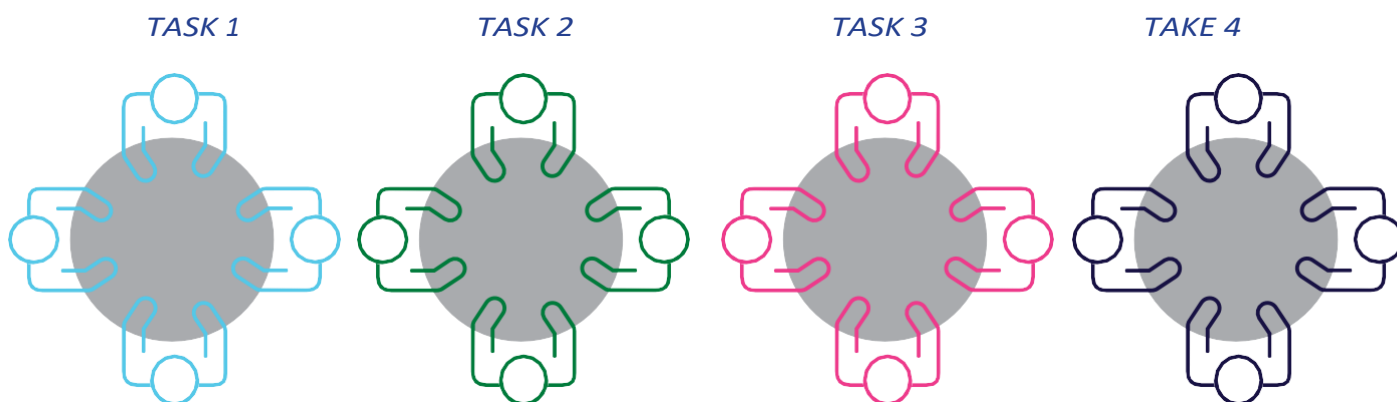

Learning to listen and summarise.

When

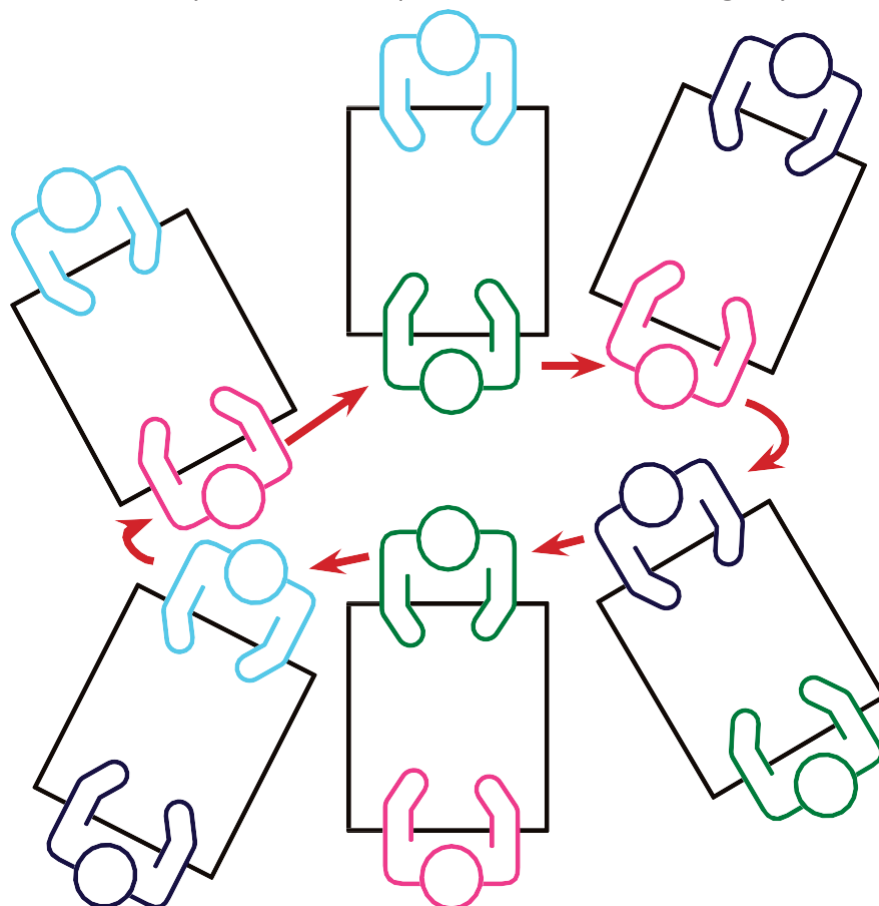

as an alternative to the teacher asking groups to 'talk about'.

Work method

Step 1: The class is divided into groups with specific tasks (study a tool). Each group works on the task for say 20 minutes. Example below 4 different assignments

Step 2: Students sit in pairs. Student A interviews student B about his work/assignment and vice versa. B only answers the questions without adding any information not requested!

Step 3: rotate to the following partners

Step 4: At the end a short class discussion will take place.
