

REACTION STRUCTURE

Target

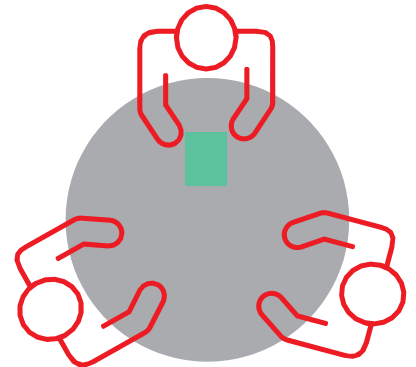

Going into depth together on the correct wording of the answer

Work method

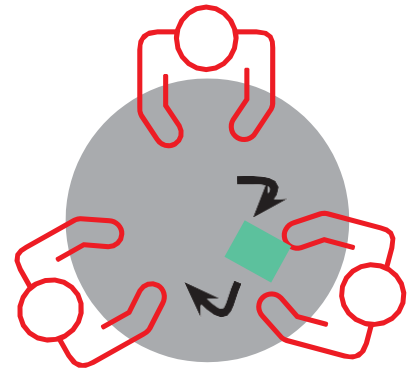

The class will be divided into groups of 3 and/or 4

The teacher asks each member of the group a question (so 3 or 4 in total). This could be a starting scene of a game

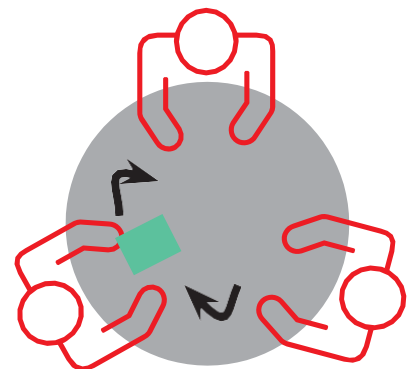

Then the first student or group writes a short sentence (or the details of the scene) as the beginning of the next scene.

Then the paper goes to the next student or group. He moves on to the next logical scene

And so on, until it reaches the first pupil or group again: the sequence, starting from the given scene, is finished

Examples

Vocabulary of video games and other ICT tools
Steps to go from scene 1 to scene 2
