

# PASS ON QUESTIONS

---

## Target

Reviewing material and practising in preparation for a test / thinking more deeply about a topic

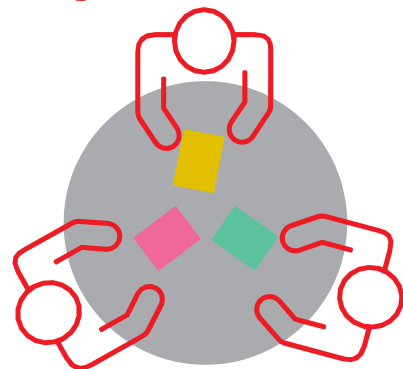

## Work method

Students form groups of three or four.

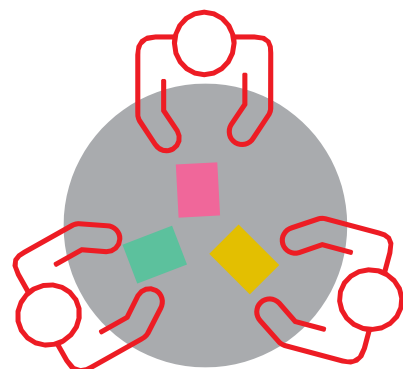

Each student is given a worksheet. Each pupil comes up with a topic on which to think of a question.

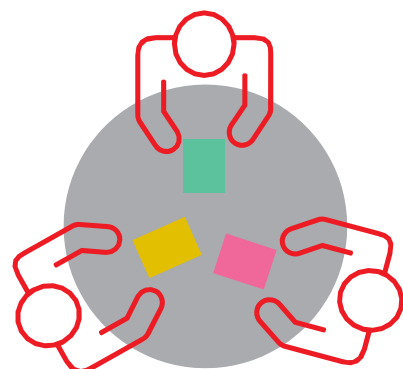

The sheet is then passed to the next student. He/she comes up with a question for the completed topic.

Again, the sheet is passed around. The third student fills in the answer.

Finally, the sheet is returned to its owner. The solutions (questions and answers) are discussed in the triplet.

## Examples

After covering a topic for some time (ict tool) At the end of a topic
