

CIRCLE GAME

Target

Practice or repeat concepts, practise words in a foreign language

Preparation: bring soft ball.

Work method

About 10 people stand in a circle.

A pupil from this group is assigned as a **counter**. Another pupil has a soft ball.

The group is informed about the topic beforehand, e.g. magnetism, weather, sports (in MVT).

The student with the ball calls out a concept of that topic and throws the ball to another person in the group. This person does the same and so on. The **counter** keeps track of how many concepts have been called out and whether these concepts are correct or have been called out before.

Variation

Make it a competition by playing this game with several groups. The group with the most correct terms wins.
